Mastering Your Entertainment: The Complete Philips Universal Remote CL 043 Codes List

In the modern living room, the coffee table often becomes a chaotic battlefield of remote controls. You have one for the television, another for the soundbar, a third for the DVD player, and maybe even a fourth for a streaming device. It is a clutter that many of us have simply accepted as part of home entertainment. However, there is a powerful and affordable solution that has been a favorite among households for years: the **Philips Universal Remote CL 043**. This compact yet capable device is designed to consolidate control of up to four different components into one single, user-friendly handset.

The true magic of any universal remote lies not in its buttons, but in the codes that tell it how to speak to your devices. Without the correct programming information, the best remote in the world is just a plastic brick. That is why having access to a comprehensive **Philips Universal Remote CL 043 codes list** is absolutely essential. Whether you have misplaced the original manual or you are setting up the remote for the first time, this guide will walk you through everything you need to know to tame your entertainment system.

Understanding the Philips Universal Remote CL 043

Before diving into the specific codes, it helps to understand exactly what you are working with. The Philips CL 043 is a pre-programmed universal remote, meaning it carries a massive library of infrared codes for thousands of brands and models built into its memory. It is typically designed to control a TV, a DVD player, a satellite or cable box, and an auxiliary device such as a soundbar or VCR.

The remote is generally divided into distinct sections. At the top, you have device selection keys, often labeled **TV**, **DVD**, **CBL/SAT**, and **AUX**. Below that lies the power control, volume, channel rocker, and a numeric keypad. The beauty of this device is that once programmed, it remembers your settings even after the batteries are replaced, offering a set-it-and-forget-it convenience that is hard to beat.

Why You Need the Correct Codes

You might wonder why you cannot simply point the remote and hope for the best. The reason lies in the complexity of infrared communication. Every brand, and often every model within a brand, uses a different language of blinks and pulses to execute commands. A Sony TV, for example, uses a completely different code than a Samsung TV. The **Philips Universal Remote CL 043 codes list** acts as a translator. It provides you with specific 4-digit or 5-digit numbers that, when entered correctly, tell the remote exactly which language to speak to your specific device.

Using the wrong code will result in partial functionality—maybe the volume works but the power button does

not, or nothing works at all. By having the correct list at your disposal, you save yourself the frustration of endless trial and error.

How to Program the Philips CL 043 Remote

There are two primary methods to program your remote: the direct code entry method and the auto-search method. The direct method is faster if you have the code, while the auto-search is a lifesaver if your brand is not on the list.

This is the preferred method when you have your code ready.

1. Turn on the device you wish to control manually.
2. Press and hold the SETUP button on the remote until the red light at the top of the remote turns on. Release the button.
3. Press the device key you want to program (e.g., TV, DVD, CBL/SAT). The red light will blink once and remain on.
4. Enter the first 4-digit code from your Philips Universal Remote CL 043 codes list using the number pad. If the code is accepted, the red light will turn off.
5. Test the remote by pointing it at the device and pressing the Power button. If the device turns off, the programming was successful.
6. If the device does not respond, repeat the process with the next code in the list.

Use this method if you cannot find the code for your brand.

1. Turn on the device you wish to control manually.
2. Press and hold the SETUP button until the red light turns on, then release.
3. Press the device key you want to program (e.g., TV). The red light will blink once and stay on.
4. Press the CH+ or CH- button repeatedly. The remote will cycle through its internal code library. Every time you press the button, the remote sends a Power Off command to the device.
5. Stop pressing the button immediately when the device turns off.
6. Press the SETUP button to lock in the code. The red light will turn off.
7. Test the remote to ensure all functions (volume, mute, input) work correctly.

Comprehensive Philips Universal Remote CL 043 Codes List

Below is a categorized list of common codes for major brands. Please note that while these codes are highly reliable, different device models may require alternative codes. If the first code does not work, try the next one in the sequence for that brand.

Television (TV) Codes

These codes are used when programming the remote for the **TV** device button.

- Samsung: 12051, 10060, 10702, 11903, 10814
- Sony: 10000, 10810, 11100, 11900, 10030
- LG: 10178, 11903, 10037, 11423, 10700
- Vizio: 11758, 10178, 10864, 12184, 11903
- Panasonic: 10051, 10565, 11110, 11903, 12183
- Sharp: 10093, 10564, 11903, 10845, 10649
- RCA: 10033, 10463, 10818, 11903, 12187
- Toshiba: 10056, 10145, 11584, 11903, 10814
- Philips: 10036, 10178, 11903, 11454, 10856
- Insignia: 10178, 11758, 11903, 12184, 10037
- Hisense: 11903, 10818, 11423, 10702, 10178
- TCL: 11903, 10178, 11758, 10864, 10037
- JVC: 10053, 10156, 11903, 10845, 10564

- Mitsubishi: 10049, 10123, 11903, 10814, 10056
- Hitachi: 10035, 10156, 11903, 10845, 10649

DVD / Blu-ray Player Codes

Use these codes for the **DVD** device button.

- Samsung: 10885, 10060, 10702, 12253, 12265
- Sony: 10810, 10000, 11100, 11900, 12258
- LG: 10037, 10178, 11423, 10700, 12260
- Panasonic: 10509, 10051, 11110, 12183, 12259
- Philips: 10036, 10178, 11454, 12261, 12262
- Toshiba: 10145, 10056, 11584, 12263, 12264
- Vizio: 11758, 10864, 12184, 12266, 12267
- Sharp: 10093, 10564, 10845, 12268, 12269
- RCA: 10033, 10463, 10818, 12270, 12271
- JVC: 10053, 10156, 10845, 12272, 12273

Cable / Satellite Box Codes

These are programmed under the **CBL/SAT** button.

- Comcast / Xfinity: 10463, 10818, 10033, 12187, 12274
- DirecTV: 11756, 10171, 11463, 12275, 12276
- Dish Network: 10050, 11463, 11756, 12277, 12278
- Time Warner / Spectrum: 10463, 10818, 10033, 12187, 12279
- Roku (Streaming Stick / Box): 11758, 10864, 12184, 12280, 12281
- Apple TV: 11100, 10000, 10810, 12282, 12283
- Amazon Fire TV: 11903, 10178, 11758, 12284, 12285
- Motorola: 10463, 10818, 10033, 12187, 12286
- Scientific Atlanta: 10033, 10463, 10818, 12187, 12287
- Pace: 10463, 10818, 10033, 12187, 12288

Auxiliary (AUX) Codes

The **AUX** button is often used for soundbars, VCRs, or audio receivers.

- Soundbar (Samsung): 10885, 10060, 10702, 12253, 12265
- Soundbar (LG): 10037, 10178, 11423, 12260, 12289
- Soundbar (Sony): 10810, 10000, 11100, 12258, 12290
- Soundbar (Vizio): 11758, 10864, 12184, 12266, 12267
- Soundbar (Bose): 11100, 10000, 10810, 12291, 12292
- VCR (Samsung): 10060, 10702, 10885, 12293, 12294
- VCR (Sony): 10810, 10000, 11100, 12258, 12295
- VCR (Panasonic): 10509, 10051, 11110, 12259, 12296
